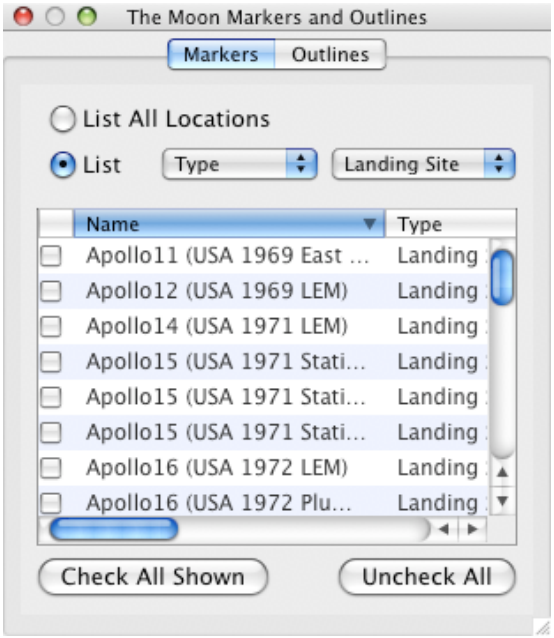
**Exercise 14:** Markers and Outlines

In this exercise you will use the Markers and Outlines feature to identify landing sites on the Moon.

**Instructions:**

1. Press the **Home** button.
2. Open the **Find** pane. Type in “Moon” in the search box.
3. Click on the contextual pop up menu icon found on the far left of the objects name - in this case “Moon”.

4. From the menu, select **Go There**.
5. Right click on the Moon. From the menu, select “Markers and Outlines”.



6. In “The Moon Markers and Outlines” window, click on “List”, select “Type” and “Landing Site”.
7. Press the **Check All Shown** button. Notice how flags are placed on the Moon identifying all of the landings sites on the Moon, including the Apollo landings.

**Question:** Locate the Apollo 11 landing site. What other landing site is close to Apollo 11? ***Hint:*** *Zoom in on the Apollo 11 site.*
