Exercise 07: Going Places

In this exercise, you will use the Find pane to locate an object and then “Go There”. You will then use the Elevation buttons to land on the object’s surface.

Instructions:

Go There

1. Press the **Home** button.
2. Open the **Find** pane. Type in “Europa” in the search box.
3. Click on the contextual pop up menu icon found on the far left of the objects name - in this case “Europa”.

4. From the menu, select **Go There**.

Elevation

5. Press the **Decrease Elevation** button until you land on the surface of Europa.

Question: What prominent object can be seen in Europa’s skies?

_____
